WordPress – *some basics* www.wordpress.com

Presented by Annick Lapalme, GRC Student Assistant
February 2014

Posts
- = Blog (usually appear as your HOME page)
- You can: categorize, tag, add pictures/videos (*Add Media)*, edit, delete them, make public/private, change publication date, add links within text

---

Tag VS Category (to sort and categorize and better retrieve)
EX: Brownies
Category: Baking or dessert
Tag: chocolate, walnuts, brownies

Pages
- You can: categorize (NOT tag) add pictures/videos (*Add Media)*, edit, delete, make public/private, change publication date, add links within text
- Have parent pages (main tabs and sub-tabs)
  - Ex: About (parent page)
    - Values
    - Experience
    - Education
  - Order of pages: done on the Page (right side)
    - Smallest number will bring page to top
    - Ex: About (no parent)
      - Values (1) (parent to About)
      - Experience (2) (parent to About)
      - Education (3) (parent to About)
  - NOTE: Some themes do NOT allow for parent pages

Links
- Can be categorized
- In alphabetical order

Appearance
- Change theme (free and NOT free)
- Customize (free and NOT free)
  - Includes colors, header, front, site title (including tagline)
- Widgets (small applications with limited functionality)
  - Ex: archives, calendar, blog stats, Flickr, Goodreads, Instagram, links, RSS, etc.
- Header (can also be done through *Customize*)
- Background (image or colour)
